
ABOUT ME

I am a 20-year-old student and a technology enthusiast with a broad scope ranging from software engineering to hardware. My passion for mechanical watches and electronics stems from a natural drive to take things apart and understand the inner workings of complex systems. I apply this "deep-dive" approach to everything I do - whether designing cloud architecture or optimizing AI services. I enjoy exploring technology down to the finest detail, as I believe that truly reliable and secure solutions can only be designed by someone who completely understands their core essence.

EDUCATION

Bachelor's Degree Faculty of Information Technology, CTU	2025 - 2028
Grammar School Václav Hlavatý Grammar School	2017 - 2025

EXPERIENCE

Chief Technology Officer Oscillator Labs s.r.o.	01.2025 - dnes
◦ <i>Designing the architecture and infrastructure of AI solutions in Azure with an emphasis on security, stability, and high scalability.</i> ◦ <i>Deploying production systems, managing cloud services, ensuring continuous monitoring, and maintaining seamless operations.</i> ◦ <i>Collaborating with the team to establish code quality standards and effectively implement the designed infrastructure.</i>	Remote
Python Developer & AI Researcher Oscillator Labs s.r.o.	08.2023 - 01.2025
◦ <i>Designing and optimizing production services utilizing LLMs with focus on speed, reliability, and efficient integration.</i> ◦ <i>Researching and implementing a Computer Vision system for video analysis in physiotherapy, focused on detecting and identifying key frames for subsequent health assessment by a physiotherapist.</i> ◦ <i>Systematically tuning prompts to minimize hallucinations and ensure consistent output quality.</i>	Remote

CERTIFICATIONS

AZ-900 Microsoft Certified: Azure Fundamentals	08.2024
<i>Certification demonstrating a foundational understanding of cloud infrastructure management, Azure service architecture, security, and identities.</i>	

SKILLS

Programming:	Python (Advanced), C++, Bash, Git
AI & LLMs:	Prompt Engineering, OpenAI API, Vector Databases
Infrastructure & Networking:	Proxmox VE, OPNsense, Linux Administration, CI/CD
Cloud & IaC:	Azure, Bicep (Infrastructure as Code)

PERSONAL PROJECTS

Homelab & Network Infrastructure	02.2026 - dnes
<i>My technological sandbox for experimenting with networking, virtualization, hardware, and anything else that catches my interest. I run a custom home infrastructure where network traffic is managed by a dedicated OPNsense router, while the rest of the services are handled by a Proxmox VE server.</i>	
Personal Website	03.2025 - dnes
<i>A web presentation serving as a digital portfolio and a testing ground for modern front-end trends. Built with a strong emphasis on clean, minimalist design, accessibility, and high performance.</i>	
<i>parma.dev</i>	
8-bit Computer	06.2024 - 08.2025
<i>Construction of a functional 8-bit computer from logic gates. The goal of this project was to gain a thorough understanding of low-level processor architecture and how hardware operates at its most fundamental level.</i>	

OTHER

I am fluent in Czech and proficient in English (B2 level), with a supplementary focus on the basics of Italian and Swedish. My main interests include watchmaking, 3D printing, and building custom electronic projects. I gained discipline and perseverance during 8 years of competitive cycling, which I later followed with target shooting.
